- Design, develop complex solutions using MVC, SQL Server 2017, complex logics in procedures.
- Worked on encrypting the browser sessions to secure the application.
- Used AJAX Controls to create an interactive Web Application and customize AJAX Control Toolkit as per requirement demand.
- Working on Table Functions and Stored Procedures as per the business requirement.
- Worked on Active Directory integration, SSL Certificate, Secure applications.
- Responsible to generate the licenses, support, review RCA forms.

Encube Ethicals Pvt. Ltd.

Role - Database Analyst
Versions - Harmony4.1, .Net, MVC, SQL Server 2014.

The Scope of the project is developing as Back-end and Front-end application to discontinue the Manual process, and switching over from time consuming MS Access, multiple excel sheets and Ready Tool based XEVMPD- submission, Master data process to a fully integrated electronic process that provides easy to use interfaces with data security to the user, manage the complete Regulatory Affairs submission data flow process of maintaining and reporting Regulatory information more accurately.

Responsibilities:

- Design, develop complex solutions using MVC, SQL Server 2017, complex logics in procedures.
- Worked on encrypting the browser sessions to secure the application.
- Design, develop, model and modify, prepare technical design documents, perform code reviews, debugging and testing.
- Work on SSMS and Visual studio integration to design and develop schemas, tables, attribute views, analytical views, calculations views, procedures and table functions.
- Used AJAX Controls to create an interactive Web Application and customize AJAX Control Toolkit as per requirement demand.

Self Projects:

Technologies Used: React JS, HTML, CSS, JavaScript, REST APIs

Jobby App Web Application
Implemented Jobby App where users can log in and can see a list of jobs with search by Job title, filters based on Salary range and Employment type, etc.
Link: https://jobbyappgmadhu.ccbp.tech/

IPL Dashboard Web Application
Each Job item is fetched dynamically using REST APIs and data is shown only after logging into the web app. And also created the job details page.
Link: https://ipldashboardgm.ccbp.tech/

Money Manager Web Application
Users are able to add incomes and expenses and also can able to see all the transaction history and also know about the balances and totals.
Link: https://moneymanagergm.ccbp.tech/

Educational Qualifications:

Bachelor of Technology in Computer Science
Raghu Institute of Technology, Visakhapatnam 2013 - 2017
